Participants number: 8

Afroz and family members 2

Haseena and family members 3

Mamta and family members 3

Trainer : Mrs. Shanaz and Miss. Kushboo

Supervision : Mr. Sofia, HFHI, Mrs. Annapoorana DESI,

Challenges

1. No proper sleep as their accommodation was not conducive to live.
2. Fear that anytime the house could collapse in the event of any calamity
3. Insanitary toilet conditions and foul smell
4. Uncomfortable cooking as the kitchen was only a make-shift arrangement
5. Low image in society and among relatives
6. Health ignorance and lack of awareness of hygiene, nutrition, immunity against diseases.

Learning Aspects:

1. Improved and a secure dwelling place gives great peace
2. Better sanitation can reduce diseases
3. Sanitary and nutritious cooking, health and nutrition awareness
4. With better kitchen cooking and washing utensils is not a strenuous activity.
5. With better dwelling place, one gains better image in society
6. Health knowledge and behavioural change is a must for home progress.

Verbatim, interview, feedback from participants from group:

1. How do feel now in the new house?
“Very Good”.
2. What changes have occurred in your life in the new house?
“Better sleep, better health, less diseases and hope for bettering our lives”
3. What changes have you observed in your children?
“They study better” “More smiles”

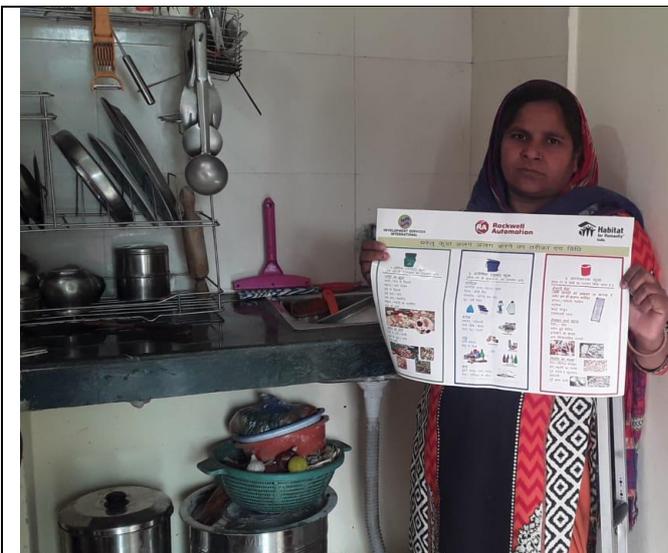

Pre test outcome: Poor Dwelling place, Miserable life, no proper sleep and rest, insecurity and lack of social and health awareness.

Post test outcome:

1. Better House has given more confidence in life and is a stepping stone for progress. Solar lighting has brightened up their lives.
2. The beneficiaries’ health has improved. One can read their faces now compared to what they looked before.
3. The physical habitat security has provided them much needed joy and happiness.
4. The beneficiaries have learnt hygiene and sanitary practices. The houses are kept clean. The disease rate has come down. The beneficiaries are vaccinated against Covid
5. Soap, phenyl, Reusable masks, Dustbins have been provided/available in each house.

Next Plan:

1. Planning is being done for enhancing their income. Sale of Fruits and vegetables, bigger shop, animal husbandry, embroidery business, Sale of FMCG etc
- 2 Improving their nutritional security through greater use of nutritional products/improved cooking and consumption of more fruits and vegetables.
3. Improving the educational status of children
4. Formation of Women’s Association/SHG in each locality to improve the surroundings and Group earning schemes.
